Summary

Information Science undergraduate with strong proficiency in Python and Machine Learning. Experienced in building data-driven applications using ML models, CNNs, and structured datasets. Skilled in data preprocessing, model training, and evaluation using Python libraries.

Technical Skills

- **Programming Languages:** Python, Java, SQL
- **Libraries & Frameworks:** TensorFlow, Pandas, NumPy, OpenCV
- **Tools & Platforms:** Google Colab, Eclipse, GitHub, Hugging Face, Dspy
- **AI & Machine Learning:** Machine Learning, Deep Learning, CNN Architectures, Image Processing, Data Preprocessing, Model Evaluation, Machine Learning Pipelines, Computer Vision, Large Language Models
- **Soft Skills:** Critical Thinking, Problem Solving, Team Work, Leadership

Experience

AI Driven Solution Intern — RankBook

Feb 2026 – May 2026

Learned and applied Python for data analysis and machine learning tasks in a practical environment. Worked with NumPy and Pandas for preprocessing structured CSV datasets, gained hands-on experience with ML workflows including model training and evaluation, and performed image preprocessing for computer vision applications. Contributed to various projects.

AI Research Intern — DRDO DYSL-AI

May 2026 – Present

Worked with Large Language Models (LLMs) for research-oriented applications involving reasoning, negotiation, and bias analysis. Utilizing Hugging Face Transformers for loading, fine-tuning, and evaluating pre-trained models, while creating structured datasets and prompts for comparative analysis.

Projects

Energy Consumption Prediction System

Developed a Machine Learning-based energy prediction system to estimate energy consumption, analyze usage patterns, and generate intelligent energy-saving recommendations.

Tuberculosis Detection Using CNNs

Built and optimized a CNN-based chest X-ray classification system in Python using preprocessing, hyperparameter tuning, and evaluation metrics.

Krishi Mitra — Smart Farming Assistant

Designed a modular machine learning application in Python to generate crop and fertilizer recommendations using structured data preprocessing and predictive modeling.

Education

Jawaharlal Nehru New College of Engineering

2022 – 2026

B.E. in Information Science and Engineering

CGPA: 9.16 / 10

Siddhartha Independent PU College, KSPUC

2020 – 2022

Senior Secondary (XII), Science

95%

Government Junior College, KSEEB

2020

Secondary School (X)

90.56%

Certifications

- Programming in Java — NPTEL (12-week)
- Introduction to Artificial Intelligence — IBM SkillsBuild

Achievements & Extracurriculars

- Participated in **MONAITHON 2025** (National-Level Hackathon) and **JSS Navotthana Hackathon** (24-hour Intercollegiate Hackathon); represented the college in **Table Tennis** tournaments and as part of the **College Cultural Team**.

Languages

English, Kannada, Hindi
